mohammedzubairuddinzameer.github.io/Portfolio

Professional Summary

Computer Science (Data Science) graduate with hands-on experience across Python development, data science, AI/ML, cybersecurity, data analytics, and full-stack application development. Experienced in building REST APIs, predictive models, Retrieval-Augmented Generation (RAG) applications, automation scripts, secure file-processing tools, dashboards, and database-backed web applications. Strong working knowledge of Python, SQL, Pandas, NumPy, Scikit-learn, Flask, FastAPI, React.js, Next.js, MySQL, MongoDB, and modern AI tooling. Completed 15+ academic, internship, and independent projects involving machine learning, generative AI, web development, data analytics, cybersecurity, and automation. Seeking entry-level opportunities in Python Development, Full Stack Development, Data Science, or AI Engineering.

Technical Skills

Programming Languages: Python, JavaScript, SQL, Java (Basic)

AI / Machine Learning: TensorFlow, Scikit-learn, Hugging Face Transformers, BLIP, LangChain, FAISS, Retrieval-Augmented Generation (RAG), Generative AI, Large Language Models (LLMs), Prompt Engineering, Predictive Modeling, Pandas, NumPy

Web Development: React.js, Next.js, Tailwind CSS, HTML, CSS, Flask, FastAPI, Node.js, REST API Design and Development

Databases: MySQL, MongoDB, SQLite, SQL Query Optimization, Relational Database Design

Data Analytics and Visualization: Power BI, Streamlit, Microsoft Excel, Matplotlib, mplfinance

Cybersecurity: AES-256 CBC Encryption, PBKDF2 Key Derivation, Hashing, File Integrity Verification, Secure Coding Practices

Blockchain: Smart Contracts, Asset Tokenization, Web3 Fundamentals

Tools and Practices: Git, GitHub, VS Code, Postman, SDLC, Debugging, Object-Oriented Programming

Professional Experience

Python Developer Intern

Jan 2026 – Jun 2026

Hackveda Solutions, Remote

- Developed Python backend modules and RESTful APIs using Flask to support full-stack application features and business workflows.
- Integrated MySQL and MongoDB databases and implemented database operations and queries for application functionality.
- Built business workflow automation and file-processing scripts, including a Google web crawler and SMTP-based email automation tool.
- Contributed to full-stack applications including FlavorFusion and Cashify Clone using modern web technologies and database integration.
- Performed structured testing, debugging, and defect resolution to improve application reliability and maintainability.

Data Science Intern

Aug 2025

Commonwealth Bank – Virtual Experience Program via Forage

- Completed an Introduction to Data Science job simulation involving data aggregation, analysis, and interpretation.

- Anonymized sensitive customer data while preserving its analytical utility for downstream analysis.
- Designed a normalized relational database for social media insights and applied database design concepts.
- Proposed data-driven strategies for extracting business value from the CommBank Twitter account.

AI Transformation Consultant Intern

Jul 2025 – Aug 2025

Tata iQ, Tata Group

- Developed a Generative AI-oriented credit risk solution to predict customer delinquency and support strategic decision-making.
- Performed data wrangling, exploratory data analysis, and machine learning model development for risk analytics.
- Used Python, Pandas, Scikit-learn, SQL, and Power BI throughout the data analysis and machine learning workflow.

Cyber Security Specialist Intern

Jun 2025 – Jul 2025

Codetech IT Solutions

- Gained practical experience in file security, encryption, hashing, and file integrity verification.
- Developed a File Integrity Checker using hashing algorithms to detect changes in files.
- Built an AES-256 Encryption Tool supporting secure file encryption and decryption.
- Applied secure coding practices and learned fundamentals of threat detection and data protection protocols.

Data Analytics Intern

Nov 2025 - Jan 2026

Uptricks Services Pvt. Ltd.

- Delivered a Sales Performance Analysis project covering KPI analysis, revenue analysis, and sales trend identification.
- Used Python, Pandas, Excel, and Power BI to transform business data into analytical insights.
- Built a business analytics dashboard and KPI reporting workflow to support data-driven decision-making.

Data Science Intern

Sep 2024 – Nov 2024

Acmegrade

- Applied machine learning classification algorithms to real-world datasets, including a Parkinson's Disease Detection project.
- Built a Movie Recommendation System using user behavior and collaborative filtering concepts.
- Worked with Python, Pandas, Scikit-learn, data preprocessing, model evaluation, and exploratory analysis.

Selected Projects

Smart Health Monitoring System *Ongoing* Python, TensorFlow, Scikit-learn, Flask/FastAPI, SQL, Streamlit

- Developing a health-data analysis platform for disease prediction, risk assessment, patient data management, and dashboard-based visualization.

AI Research Paper Simplifier – RAG *Ongoing* Python, LangChain, FAISS, Hugging Face Transformers, FLAN-T5, Streamlit

- Developing a Retrieval-Augmented Generation application that accepts research PDFs, retrieves relevant document context, summarizes papers, and provides context-aware question answering.

Image Caption Generator

Python, Hugging Face Transformers, BLIP, Streamlit, PIL

- Built a vision-language application that generates natural-language captions from uploaded images using BLIP-based models.

Advanced Encryption Tool

Python, Streamlit, SQLite/MySQL

- Developed a secure file-encryption application using AES-256 CBC encryption, PBKDF2 key derivation, OTP sharing, and password protection.

FlavorFusion

Next.js, React, Tailwind CSS, MongoDB

- Built a full-stack food-ordering platform with authentication, responsive user interface, and MongoDB database integration.

Smart Blood Pressure Monitoring System

Python, Streamlit, Pandas, Matplotlib

- Built a dashboard for blood-pressure tracking, health analytics, risk visualization, and historical data analysis.

Google Web Crawler and Email Automation

Python, Requests, BeautifulSoup, SMTP

- Developed an automation tool for website crawling, business-contact extraction, and automated email outreach.

Additional Projects

- **Cashify Clone** – Next.js, React, Tailwind CSS: Developed a responsive device-selling platform with product listings and frontend application flows.
- **Personal Portfolio Website** – Next.js, React, Tailwind CSS: Developed a responsive portfolio website showcasing projects, certifications, experience, and resume.
- **Candlestick Pattern Visualization** – Python, mplfinance, Matplotlib, Pandas: Developed financial charting functionality for candlestick pattern visualization and analysis.
- **Trend Line Analysis on HDFCBANK Dataset** – Python, Pandas, Matplotlib: Performed historical stock-data analysis and trend-line visualization.
- **TradingView Screener Research** – Python: Conducted research into stock-screening concepts and technical analysis workflows.
- **Blockchain Tokenization Project** – Blockchain, Smart Contracts: Explored asset-tokenization concepts and smart-contract fundamentals.

Education

B.Tech in Computer Science (Data Science)	2022 – 2026
<i>KG Reddy College of Engineering and Technology</i>	78%
Intermediate – MPC	2020 – 2022
<i>Iqbalia Junior College, Hyderabad</i>	86%
Secondary School Certificate – CBSE	2020
<i>Shivaji Vidyapeeth School</i>	65%

Certifications

- IBM Artificial Intelligence
- Microsoft Skills for AI
- Commonwealth Bank – Introduction to Data Science Job Simulation, via Forage
- AI-Enabled Applications for Customer Service
- Tata iQ – AI Transformation Consultant Program

Languages

English (Fluent), Hindi (Fluent), Urdu, Telugu
